Outgoing mail server

Here you will require SMTP details for the email that you want to set as the outgoing email id in case of notifications & updates to the ERP users.

We can simply create an email id as noreply@myerp.com

SMTP configuration details required will be

Hostname

Port

Ideally it will be 25, 465 or 587.

Username

Your full email id.

Password

Password of the above added email id.
